

Turmericicle®

Turmeric and Coconut Oil Powder

- Complementary feed for horses and dogs
- Supports normal inflammation response
- Supports healthy joint function
- Supports skin health

What is Turmericicle?

Turmericicle is a unique powdered blend of well researched nutraceutical herbs including two varieties of turmeric, black pepper and resveratrol, which have demonstrated to help with conditions such as joint inflammation and skin conditions. Combined with powdered coconut oil, this easy to feed powder is suitable for horses, cattle and dogs.

Feeding Guidelines

Turmericicle should be introduced gradually into diet over a two week period

Horses:

Morning feed: 1 x 25g scoop

Evening feed: 1 x 25g scoop

Based on a 500kg horse

A 500g tub will last horses an average of 10 days. A 2kg tub will last horses an average of 40 days. Other sizes also available.

Dogs: Add to feed, feed twice a day

Size	Teaspoon/s per feed
<5kg	1/4 (1.25g)
5-10kg	1/2 (2.5g)
10-15kg	1 (5g)
15-30kg	1 and 1/2 (7.5g)
>30kg	2 (10g)

A 500g tub will last companion animals an average of 25 days. A 2kg tub will last companion animals an average of 125 days.

Ingredients

Proprietary mix of Curcuma Longa, Curcuma Xanthorrhiza, Powdered Coconut Oil (PowerStance), Ground Black Pepper, Resveratrol Hydrophobic silica.

Sizes Available

500g / 1.5kg / 2.5kg

About the Ingredients

Turmeric

Turmericle contains a blend of two different species of **turmeric** to optimise the benefits they both offer. One form, *Curcuma longa*, is the traditional type of **turmeric** commonly used in cooking, foodstuffs, cosmetics and medicine. *Curcuma xanthorrhiza*, has been used as a traditional medicinal plant in some tropical countries such as Indonesia and Malaysia. It contains the xanthorrhizal oil which may offer additional benefits.

PowerStance® powdered coconut oil

PowerStance is a unique powdered coconut oil, designed to make feeding oil easy. Coconut oil contains high levels of medium chain triglycerides (MCTs) which provide the body with a readily available source of Lauric acid. Lauric acid converts to monolaurin and may provide anti-bacterial, anti-microbial and anti-fungal properties. The benefits of supplementing animals with coconut oil may

include improved digestive health, enhanced coat and skin condition. Coconut oil is absorbed directly into the portal blood, and therefore is metabolised faster than other oils.

Ground Black Pepper

Curcumin is treated as a foreign substance by the liver. It is therefore rapidly metabolised and excreted. Piperine in **black pepper** blocks curcumin excretion by the liver and increases curcumin bioavailability. Piperine activity is reduced in sunlight. **Turmericle** must be stored in a sealed container to maintain the efficacy of the **black pepper**.

Resveratrol

Resveratrol is added as an antioxidant that may help the body efficiently detoxify free radicals and may assist in decreasing inflammation. This **resveratrol** is derived from Japanese knotweed.

Testimonial

Before

After 3 Weeks

After 1 Year

"A year ago I started adding Turmericle to the the feed of my Percheron Opie, to help with his itchy and sore tail. After only 3 weeks I could see a difference, with the redness reduced and hair beginning to regrow. Now, one year later, his itch has practically gone and he looks INCREDIBLE. Thanks for making the best product ever, he has been on it for a year straight, I can't stop raving about it."

Macy Morris, 2016
